SUMMARY

Fourth-year B.Tech Computer Science (AI/ML) student at Quantum University with hands-on experience in Python, SQL, machine learning, and data analysis. Skilled in building end-to-end ML solutions using Scikit-learn, Pandas, NumPy, TensorFlow, and PyTorch, including a Transformer model built from scratch. Experienced in data cleaning, exploratory data analysis, predictive modeling, and NLP. Seeking to apply AI/ML and data analysis skills to deliver measurable business impact.

EDUCATION

•Quantum University, Roorkee, India *Aug 2023 – May 2027*
Bachelor of Technology in Computer Science (AI/ML) CGPA: 7.12 / 10

•JS Memo Public School, Mainpuri, Uttar Pradesh *April 2020 – March 2021*
Senior Secondary (Class XII)

•JS Memo Public School, Mainpuri, Uttar Pradesh *April 2018 – March 2019*
Secondary (Class X)

EXPERIENCE

•Samatrix Consulting *June 2025 – Aug 2025*
Data Analyst Remote

– Cleaned and preprocessed raw datasets and performed exploratory data analysis (EDA) to identify trends and data quality issues.
– Built visualizations to communicate key findings to stakeholders, supporting data-driven decision-making.
– Applied machine learning models (regression and classification) for predictive analysis on business datasets.
– Completed multiple end-to-end data analysis projects, from data ingestion through model evaluation.

•Internshala *Aug 2024 – Oct 2024*
Python Programming Intern Remote

– Strengthened core Python programming concepts including data structures, OOP, and file handling.
– Built small applications with a focus on logic building, code efficiency, and readability.

PROJECTS

•Build GPT From Scratch | **Link** *Sep 2026*
Python | PyTorch | Deep Learning | Transformer Architecture

– Built a decoder-only Transformer (GPT) from scratch in PyTorch, implementing multi-head self-attention, token embeddings, and layer normalization without pre-built transformer libraries.
– Trained a character-level language model on the Tiny Shakespeare dataset using the AdamW optimizer and cross-entropy loss.
– Generated coherent Shakespeare-style text, demonstrating core NLP and deep learning fundamentals.

•Heart Disease Prediction | **Link** *Sep 2026*
Python | Pandas | NumPy | Scikit-learn

– Built a Logistic Regression model to predict heart disease risk from clinical data, achieving 85.12% accuracy on training data and 81.97% accuracy on test data.
– Performed data preprocessing and feature engineering with Pandas and NumPy, and built a real-time predictive system for diagnosis support.

•Movie Recommendation System | **Link** *Aug 2026*
Python | Pandas | NumPy | Scikit-learn | Streamlit

– Developed a content-based recommendation engine using CountVectorizer and Cosine Similarity to suggest similar movies.
– Deployed as an interactive web app with Streamlit, integrating the TMDB API for live movie data and posters.

SKILLS

Languages: Python, JavaScript, C++, SQL
Machine Learning & AI: Scikit-learn, TensorFlow, Keras, PyTorch, Natural Language Processing (NLP)
Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Excel
Frameworks & Tools: Streamlit, Groq, OpenAI API
Development Environments: Google Colab, Jupyter Notebook

CERTIFICATIONS

•Completed "Machine Learning A-Z" by Kirill Eremenko and Hadelin de Ponteves — Udemy *2026*
